India COVID Response Fund-2
Interim Report
July 21, 2021
The second wave of COVID-19 required us to respond with a speed to match its galloping pace. On the strength of our transparency and robust execution of the India COVID Respond Fund-1, we were fortunately in a position to quickly harness the outpouring of compassion and direct it to the need on the ground.

But this time round, with the runaway disease causing more short-term distress than the lockdowns to control it, we had to react to the scale of the health emergency with alacrity and put in new processes to meet new demands. To fill the gap in oxygen supply, for instance, we were not just allocating funds to our committed network of NGOs, but also directly purchasing cylinders, concentrators, etc in partnership with other organisations and government agencies.

While responding to these challenges, we ensured the GiveIndia team kept trust, compliance, governance, risk and impact at its core so promises made to donors could be delivered with integrity. Keeping the same principles in place, when the volume of coronavirus cases moved from urban to rural areas, and then started declining, we adapted our interventions to provide support where most needed and redirected efforts to long-term infrastructure creation.

We delivered life-saving medical equipment and humanitarian aid in the form of cash relief, meals and ration kits, and now continue to set up ICUs and oxygen generation plants, and support vaccination drives in rural areas.

ICRF-2 evolved as one of the largest giving collectives created in India thanks to our team’s dedicated and selfless efforts, our competent and tested partners and the limitless compassion to alleviate people’s suffering.

ICRF-2 Steering Committee
Govind Iyer, Ingrid Srinath, Shailesh Haribhakti
COVID SCENARIO IN INDIA

Experts feared the second wave, but when it came, it exceeded their worst expectations. While the first wave of COVID-19 took almost ten months to infect over 10 million people in India, the virus took just ten weeks to infect over 11 million during the second wave. It created a daily oxygen demand ten times that of the pre-COVID period.¹

CHALLENGES

Severe shortage in oxygen supply due to:
- Increased number of cases requiring oxygen support
- Oxygen plants concentrated in East and South of India
- Not enough cryogenic tankers for inter-state transfers
- Shortages in cylinders for last mile delivery to hospitals

Demand-supply gaps in hospitals:
- Shortage of ICU beds
- Shortage of life-saving equipment like ventilators and BiPAPs

Rise in poverty:
- Families lost breadwinners to COVID
- Loss of livelihood due to lockdowns & shutting down of businesses
- Unemployment rates in double digits
- Number of BPL persons up by 15%

Data source: mygov.in/covid-19 Data as on July 15, 2021

¹ India Today
THE WAVE & OUR RESPONSE

As the virus raged, we prioritized the urgency for oxygen at hot spots and then widened our operations.

1. Started procurement of OCs and cylinders
2. Started cash relief, food and dry ration distribution
3. Started COVID care facilities
4. Delhi govt partnership
5. Karnataka govt partnership
6. Telangana govt partnership
7. Started zero rental OC deliveries with OLA
8. Oxygen plants procured
9. Launched vaccination campaign
10. Continue support for rural healthcare, oxygen plants, humanitarian aid and vaccination

- Daily new cases:
  - 100K+ launched 19 Apr
  - 200K+ 30 Apr
  - 400K+ 15 May
  - 150K+ 30 May
  - 100K+ 15 June
  - 200K+ 30 June

Healthcare includes oxygen support, physical infrastructure, medical equipment & vaccination.
Humanitarian aid includes cash relief and food & ration.
ICRF-2 REACH

HEALTHCARE

115 partners
(NGOs, govt agencies, district admin)

27 states + 2 UTs

1.5 M citizens
each month (est. impact)

HUMANITARIAN AID

79 NGOs

24 states + 1 UT

380K citizens

28 states and 2 UTs reached with healthcare and humanitarian interventions, working in coordination with NGOs, local partners and government agencies

Total Amount Allocated - State wise
THE GIVEINDIA PROCESS

1. Demand Aggregation
   - Working in close coordination with stakeholders - hospitals, NGOs, district collectors, municipal corporations, state and central govts

2. Global Procurement
   - India, China, Singapore, USA, Turkey, Denmark, Finland
   - Partner for transport & delivery logistics with PMR, Amazon, Shadowfax, Delhivery

3. Deployment
   - Grants to NGO partners
   - Direct cash transfer to beneficiaries
   - Deployment at hospitals, PHCs, CHCs, Covid Care Centres & Isolation Centres

4. Reporting and Monitoring
   - Deployment documentation
   - Testimonials from hospitals, doctors & beneficiaries
   - Periodic impact reports
OXYGEN SUPPORT

13,218 oxygen cylinders
25,074 oxygen concentrators
50 oxygen generation plants
2 cryogenic tanks
94 NGO partners
688 hospitals

There were a number of reasons for the oxygen crisis during the 2nd wave of COVID-19 in India — gaps that GivelIndia tried to fill:

Challenges
- Spike in demand
- Gaps in logistics

GivelIndia’s response
- Oxygen concentrators
- Oxygen generation plants
- Installing OGPs at hospitals to meet long term demand

279 districts of 25 States and 2 UTs supported through GivelIndia’s oxygen intervention for COVID patients

OXYGEN SUPPORT

Highlight — Oxygen Generation Plants (OGPs)

GiveIndia is enabling hospitals, especially in rural districts, to become self-reliant by installing OGPs on their premises. The OGPs will cut transportation costs, delays in oxygen supply & dependency on refilling of cylinders.

Sourcing of OGPs

- Leading global manufacturers known for product quality & lifespan
- Generators from overseas vendors, compressors & air dryers from India for cost optimisation
- Identified local partners for quick implementation

50 OGPs delivered across 16 States + 2 UTs through GiveIndia’s oxygen support intervention

OGPs Delivered - State wise

Leading manufacturers supplying OGPs

- Electrowing, India
- Laser Gas Oy, Finland
- ProHealthcare Scientific, India
- OXYMAT, Denmark
- Ozcan, Turkey

OXYGEN SUPPORT

Highlight — Oxygen Bank - O2 For India

We established oxygen banks under the ‘O2 For India’ initiative, in partnership with Ola. This set the stage for others, including the government to start such programmes. It is also a model for future ‘banks’ where people can have easy access to medical equipment, and it will discourage hoarding by a few.

- Zero rent, nominal deposit
- Deployment on rotation basis
- Delivery to patients by Ola

Oxygen concentrators will be handed over to government hospitals across the country as the COVID crisis recedes.

Start Date:
May 7, 2021

Oxygen concentrators

O2 for India launched in partnership with OLA for home delivery of OCs

---

Tommy | @daktre97 · May 17

Thank you @GiveIndia and @OlaCabs for this! You guys came to our rescue when we couldn’t find one anywhere else.
NGO spotlight — RightWalk Foundation

RightWalk Foundation with deep roots in Uttar Pradesh, drives equity, inclusion and social justice by co-shaping public policies and translating them into action by partnering with system leadership, lawmakers and communities. RightWalk intervenes at scale by unlocking the potential of social policies and public finance through advocacy, e-governance, capacity building & distributed delivery.

The Impact
In a month, approximately 792 people benefited from the 99 distributed oxygen concentrators (OCs). It is estimated that these OCs can help over 4,750 people in six months.

‘IN CONSTANT USE’
Dr Mohammad Amaan from Medwell Hospital, which received two concentrators, said “Both the oxygen concentrators are in constant use. One 10 LPM OC was used on a patient who was COVID positive and his oxygen saturation was at 84. After using the OC for two days, his oxygen saturation improved to 96 and was soon discharged.”

‘87 PATIENTS RECOVERED’
Himanshu Nagpal (IAS), joint magistrate, Saharanpur, who coordinated the distribution of oxygen concentrators at the CHC, Ambeta, Saharanpur said: “The oxygen concentrators donated by RightWalk Foundation have been of great help. Thanks to these units, so far, 87 COVID positive patients have recovered at CHC Ambeta.”

‘OF GREAT HELP’
“The oxygen concentrators donated by RightWalk have been of great help. We had a patient named Rudrabaksh Singh who was admitted to the hospital with an oxygen saturation of 70. We immediately put him on the 10 LPM oxygen concentrator and his oxygen saturation improved to 90 plus,” said Dr. Atul Srivastava, a nodal officer at the Ortho ward at the district hospital in Bahraich.
India has approximately 1.9 million hospital beds and about 60% of these are in private hospitals. This translates to just 1.5 beds per 1,000 people. The number of ICU beds stands at 95,000. The availability of ICU beds was far below the demand of approx 500,000 at the peak of the second wave¹.

GiveIndia is working with partners in

- Setting up of ICUs and critical care units
- Augmenting hospital capacity
- Setting up COVID Care and Isolation Centres

¹ Business Standard
NGO Spotlight — Snehalaya

With support from GiveIndia, Snehalaya opened a 130-bed COVID Care Centre to provide medical and quarantine facilities to COVID-positive asymptomatic patients or patients with mild to moderate symptoms. Snehalaya prioritised the marginalised sections of society living in the Ahmednagar district of Maharashtra for treatment and admission. The NGO also serves the differently abled in rural areas through its interventions.

The Impact

700+ COVID-19 patients were given treatment at the centre, thus reducing the load on hospitals.

CLOSE MONITORING FOR KAMLABAI
Kamlabai Mulay, a resident of Bhausaheb Firodiya Old Age Home, tested positive for COVID and was sent to Snehalaya COVID Care Centre for further management. The centre provided oxygen support, meals, medicines and close monitoring. After 13 days, Kamlabai recovered, was sent back to the home in an ambulance and advised to return for regular check ups.

CASUAL WORKER CARED FOR
COVID-positive Damukaka’s oxygen levels had dipped to 89% when he was admitted to the Snehalaya COVID Care Centre. The casual worker from Ahmednagar district was immediately put on an O2 concentrator and administered oral medications according to ICMR guidelines. His condition started improving from the fifth day of his admission and was discharged after a 13-day stay.

WHEN COVID STRUCK A FAMILY
For differently abled Tara Bai, the Snehalaya COVID Care Centre was a refuge when she, along with her husband and children, tested positive for COVID. The family stayed at the centre for seven days. Besides receiving COVID care, the family was provided with nutritious meals and other facilities.

Dedicated Covid Care Centre, in partnership with the Government, in Ahmednagar, Maharashtra. Image Courtesy: Snehalaya
Faced with the worst public health emergency in decades, hospitals saw a shortage of lifesaving devices like ventilators and depleting stocks of medical supplies including masks, syringes and gloves. India’s stock of 48,000 ventilators¹ is less than 50% the number required for such emergencies².

**21 states** covered through our healthcare interventions. Supported hospitals, ASHA & Anganwadi workers with equipment and risk assessment kits
B.PAC, a non-partisan citizens' group that aims to improve governance in Bengaluru, provided free ambulance support from hospitals to crematoriums and burial grounds to transport the COVID-deceased of families from economically disadvantaged backgrounds.

The Impact
At the peak of the second wave of the pandemic, B.PAC provided free ambulance service for a month, starting in May 2021. The ambulances made 62 free trips covering 4,275 kms.

VACCINATION

After addressing the urgent healthcare and humanitarian needs, the challenge now is to prevent the spread of the virus to the healthy population. As the anti-COVID vaccination drive rolls out, GiveIndia aims to plug loopholes in the country's access, distribution, and administration of the vaccines.

Strategy

- **Equitable access**: Make vaccines available to all sections of society, particularly low income, marginalised communities.

- **Rural distribution & administration**: Work towards reducing vaccine hesitancy by busting myths & misinformation about COVID and facilitate ‘last mile delivery’ for interior villages.

- **Capacity building**: Increase delivery capacity by training healthcare professionals to administer the doses.

**Action on the ground**

- 20,000 vaccines administered in partnership with Narayana Health, Clinnik and Sparsh Hospital.

- Partnership with hospitals (Aster, Apollo) to vaccinate waste pickers, gig workers, truck drivers etc. in Bangalore and other locations in Karnataka (100K doses).

- Amazon vaccination drives for 4 centres in partnership with BBMP, Bangalore’s municipal authority.

Vaccination drive for Government School student’s parents, Vaidehi Government School, Mahadevpura, Bangalore. Image courtesy: ACT
HUMANITARIAN AID

The pandemic badly disrupted the livelihoods of the poor. People living in households with daily incomes below ₹375 per day increased by 77% by the end of October 2020¹. These numbers would have aggravated further during the 2nd wave as 98% of the country was in some form of restriction or statewide lockdown². The unemployment rate at 11.9% in May 2021³ is the worst India has seen in the last 30 years. To alleviate the suffering, GiveIndia is working with NGO partners to provide:

- **Cash relief**
  - Interim relief to low-income families who have lost the earning member to COVID

- **Food & dry ration**
  - Meals comprise staples like rice, daal, vegetables, chapati and more
  - Monthly dry ration kits contain daal, rice, salt, oil, atta, masala, tea, sugar etc

³ CMIE
CASH RELIEF — HOW WE GO ABOUT IT

1. **Demand Aggregation**
   - GiveIndia partners with GiveAssured NGOs to identify BPL families of COVID deceased

2. **Due Diligence**
   - Verification of NGOs & beneficiaries
     - NGO verification - legal/ financial/ program/ operational compliance checks
   - 2-step beneficiary verification process
     - Identity, background checks
     - Verification calls
   - Documents collected:
     - Death certificate & COVID positive report
     - The BPL card
     - Aadhar card of beneficiary

3. **Disbursement**
   - GiveIndia disburses funds to NGOs
   - Direct bank transfer from NGOs to beneficiaries
   - Post-verification calls by GiveIndia

4. **Reporting**
   - Periodic reports from partner on implementation & impact status
NGO Spotlight — Rise Against Hunger-India (RAHI)

RAHI’s signature program is providing ready-to-cook, high-protein meals containing 21 essential nutrients including Vitamin A, Vitamin B1, iron and folic acid. With GiveIndia’s support, they have continued to supply these fortified meals to their existing group of beneficiaries, including children of daily wage workers, and to vulnerable groups economically affected by the 2nd wave of COVID-19.

The Impact
RAHI has already distributed more than 100K boxes containing these nutrient-rich meals to distressed populations in small towns of Maharashtra’s Palghar, Raigad, Aurangabad and Kolhapur districts.

HELP FOR MOTHER & DAUGHTER
35-year-old Bala lives with her daughter in a temporary dwelling of plastic sheets in Palghar, Maharashtra. Both mother and daughter are speech and hearing impaired.
Bala lost her only source of income as a domestic help during the 2nd wave of COVID. RAHI, through its widespread network, reached out and ensured that Bala and her daughter have nutritional food for two months.
Forced to beg for his family
To feed his family, Mohd Sahid was forced to seek alms from motorists as no employer would hire him due to his disability. As Delhi went into lockdown, his family was deprived of basic necessities. Our NGO partner Society For Child Development, set up to create equal opportunities for people with disabilities, reached out to Sahid with a ration kit that would last for him and his family till July 2021.

Factory worker’s food challenge
Visually challenged Mohd Aslam works in a factory and lives with his family in a one-room tenement on the outskirts of Delhi. As a result of the lockdown, factories were shut and he and his family were left without any income or food. Society For Child Development intervened and provided the family with a month’s ration.
INDIA’S COVID CRISIS IS FAR FROM OVER

Lockdowns cannot last forever. New variants, the slow pace of vaccination and inadequate health infrastructure may lead to more waves

### CHALLENGES

Arvind Kejriwal @ArvindKejriwal • May 24
Second wave in control, started prep for 3rd wave.

Imported 6000 oxy cylinders. Can set up 3000 oxy beds with these. Grateful to HCL, Give India and Central govt (esp Indian embassy in Beijing) for helping us get these cylinders to Delhi.

Many more preps underway

Shirpa Shukla • 3rd+ Consultant in Social Media Optimization SMO, Online reput... 1mo • 0

Thank you Givelfindia and Atul Satija for supporting Sukarya’s Covid relief distribution drive in the slums of Gurugram

giveindia #covidreliefindia
“GivelIndia's pursuit of bringing trust, convenience and choice for donors is aligned with our goal to enable more informed and intentional generosity by everyday givers. We are happy to be a part of this respected group of funders who have come forward to support this effort.”

Robert Rosen, Director of Philanthropic Partnerships
Bill & Melinda Gates Foundation

“People often wonder where the money would go. I can tell you, I started working with GivelIndia when the pandemic first broke a year ago. We validate them, it’s a very good, reliable organisation. People should have confidence in giving to GivelIndia and know that the money will be used immediately to help somebody.”

Vinod Khosla, Venture Capitalist

“GivelIndia was one of the first to understand the challenges that we as a society faced and mobilised enormous resources to support the people in need — a commendable job, thank you.”

Sanjay Gupta, Country Manager and VP, Google India

“When Nick and I decided that we wanted to start a fundraiser to provide medical aid for India during one of its worst ever crises, the Covid 19 pandemic, we were both sure that we needed a partner who not only had the experience but also had boots on the ground in these unprecedented times. We turned to GivelIndia. As the largest organisation on ground in India providing Covid relief at the time, the team was able to help us bring our #TogetherForIndia fundraiser to life very quickly. First and foremost, they are transparent - with regular updates, we were able to see where the funds were being deployed and what it was being used for. Secondly, because they were doing so much work on ground, we were able to pivot our objectives basis the immediate needs at any given time. They have a team of professional, experienced, passionate people who have supported our efforts and ensured that aid was provided where needed the most.”

Priyanka Chopra Jonas, Actor, Producer, Entrepreneur
ABOUT GIVEINDIA

GivelIndia exists to alleviate poverty by enabling the world to give. Established in 2000, it is the largest and the most trusted giving platform in India. It enables individuals and organizations to raise and donate funds conveniently to any cause they care about, with offerings including crowdfunding, corporate giving, cause marketing, and philanthropy consulting. GivelIndia’s community of 2M+ donors and 250+ partners have supported 2,200+ verified nonprofits, serving 15M+ people across the country.

The second wave of COVID-19 hit us far more aggressively than it did last year, and rapidly led to the country being engulfed by a health and humanitarian crisis.

At the same time, we saw generosity like never before, with people from all walks of life joining us as donors, partners and volunteers to respond to the calamity. We also learned to quickly pivot our role in interventions - from supporting to creating medical infrastructure and augmenting oxygen and medical supplies.

However, the experience over the last two months has demonstrated just how much work we have left to do - not only to recuperate from the deadly second blow of the virus but also to reconcile with the new reality of a pandemic we simply can’t wish away. So we will be focusing on supporting healthcare infrastructure and vaccination drives in rural areas, while continuing to back livelihood rebuilding efforts and humanitarian needs.

We are deeply grateful for your support and counting on it to keep working towards recovery and resilience.

Dhanyawad
